

current location, in region.

```
cation(string loc) {
```

```
;
```

```
n:=loc;
```

rent location is changed so what enriched deli
e for is also changed -- therefore re-establish
on the changed current location
quest edr;

```
1 EnrichedDeliveryRequest(region=loc, ranking<  
st(edr.dr.requestId, edr.dr.store, driver,  
equippedPickupTime, edr.dr.requiredDeliveryTime
```

```
loc);
```
